SUMMARY

Passionate Java-Kafka developer with 2 years of experience, specializing in designing and implementing data streaming applications. My expertise includes Java, Spring Boot, Oracle along with GitHub, JPA with Hibernate, Spring REST and Microservices. Looking for opportunities that enhance my knowledge and skills in development and also proficient in using various tools and technologies along with having ability to learn new technical information.

EDUCATION

JECRC University, Jaipur	Jaipur, India
<i>B.Tech in Computer Science CGPA : 9.15</i>	<i>2018 - 2022</i>
Shree Jee Public Sr. Sec. School	Nathdwara, India
<i>Senior Secondary (RBSE) Percentage : 86.60</i>	<i>2017 - 2018</i>
Shree Jee Public Sr. Sec. School	Nathdwara, India
<i>Secondary (RBSE) Percentage : 95.83</i>	<i>2015 - 2016</i>

WORK EXPERIENCE

CAPGEMINI	Pune, India
<i>Senior Software Engineer</i>	<i>Sept 2022 - Present</i>

- Worked within Barclays account on data streaming application focused on designing starter template classes by providing specified configurations that simplify data streaming for tenants and managed by using Bitbucket.
- Developed fully functional REST APIs and Microservice Application by using Spring Boot, Java, Oracle and integrated in MuleSoft as part of Mulesoft Training.
- Developed Microservices Application by using messaging system as Apache Kafka and implemented the producer – consumer application using Spring Boot, Java and store the real-time data into database as part of Kafka Training.
- Introduced Topic level monitoring in Kafka using Prometheus and Grafana. By employing Prometheus JMX Java agent, gathered metrics and created a Grafana dashboard for analysis and visualization.
- Writing Junit test cases for different classes using Embedded Kafka for setting up Kafka environment within test cases.
- Writing a Java, Kafka and Spring Boot based backend application for handling continuous flow of data and added filters by integrating API gateway i.e. Zuul Proxy.
- Responsible for provisioning support for servers across various environments.

CAPGEMINI	Pune, India
<i>Senior Analyst Trainee</i>	<i>Jan 2022 - May 2022</i>

- Completed ADAPT training and learnt various technologies like Java, HTML, CSS, Javascript, RDBMS using Oracle, JDBC and Junit.

PROJECTS

FLIGHT MANAGEMENT SYSTEM

Sept 2022

- The Flight Management System is a Java-based application used for booking flight tickets. It is developed as REST API web service using STS, synchronized using Git, integrated using Anypoint Studio, deployed on CloudHub, published as a public asset on AnyPoint Exchange.
- It combines information offered by many airlines and thus gives the user details and pricing in real-time. They can easily book, cancel, view, and change their bookings using this application.
- Tools/Technology: Spring Tool Suite, Anypoint Studio, Postman, Java, Spring Boot, JPA with Hibernate, H2 Database, MuleSoft
- My Contribution: Create RAML specification for Scheduling Flights microservices. Configuring database and writing queries to perform CRUD operations. Writing backend code in JAVA and the admin side components for Scheduling Flights.

WIKIMEDIASTREAM TO DATABASE

Feb 2023

- This is the best use case to demonstrate the usage of Apache Kafka to deal with large amount of data.
- We create a Kafka producer to read a large amount of real time steam data from the Wikimedia. Then write the data to Kafka Broker and read the data by consumer to save it into database.
- Tools/Technology: Command Prompt, Spring Tool Suite, PostgreSQL, Java, Spring Boot, Kafka.
- My Contribution: Configured and implemented producer to send the data to topic and consumer to read data from the topic and PostgreSQL database to save the data into it.

GROCERY MART APPLICATION

May 2021

- It is a 3 tier application development which gives a basic understanding of how the grocery system operates.
- It manages the products available in the mart, places the new order for customer and also keeps the track of customer's order details.
- Tools/Technology: HTML, CSS, JavaScript, Python, Flask, MySql
- My Contribution: Designing back-end part and manage database

TECHNICAL SKILL

Tools	Kafka, MuleSoft, GIT, Development & Build Tools (Maven), DevOps (GitHub, CI with Jenkins, SonarQube), Postman, Swagger
Languages	C, C++, JAVA, SQL
Databases	Oracle (SQL), PostgreSQL, MySQL, H2 Database
Frameworks	JPA with Hibernate 3.0 (Basics), Spring 4.0 with Spring Boot, Spring with REST, Microservices using Spring REST, Junit
Relevant Courses	Data Structures and Algorithms, DBMS, Operating System
Platforms	AWS(Basic), Docker(BASIC)
Applications/IDE	Eclipse, Spring Tool Suite (STS), IntelliJ, Anypoint Platform, Anypoint Studio
API Gateway	Zuul Proxy

CERTIFICATES

- AWS Cloud Practitioner May 2023
- MuleSoft Certified Developer Level - 1 Jan 2023
- Microsoft Certified: Azure Fundamentals June 2024
